

# AS Sign Coater

Liquid laminators

**The AquaSEAL Sign Coater is a uniquely effective, low cost liquid laminator for indoor and outdoor signs and banners. Extremely easy to operate, the machine applies a smooth and even finish, to enhance and protect graphics from UV, abrasion, water and chemicals.**

The AquaSEAL Sign Coater liquid is designed to run with uncoated media. 'Crystal clear' protection is assured for up to two years. The Sign Coater is an environmentally safe system which is easy to clean after use and requires no special ventilation, making it totally safe in any working environment. The system combines a 1372 mm automated sheet-fed liquid laminator, with a gloss liquid laminate and a cleaning agent.

The Sign Coater is ideal for short-term graphics applied to flat and simple curves. The machine is not recommended for complex curves, rivets or corrugation. Recommended applications include indoor and outdoor signs, banners, trade-show graphics, illuminated signage, point-of-purchase and advertising graphics.

### The AquaSEAL Sign Coater provides the following features

- Capable of coating up to 1372 mm prints
- Designed for use with prints using solvent and eco solvent based inks
- Ideal for short or long runs
- Applies a smooth, consistent finish
- Supplied with a stand for easy mobility
- Quick to install - no special equipment, electronics, or ventilation system needed
- Very easy to operate - no special training required
- Simple cleaning - quick and easy 30 minute process

### The AquaSEAL Sign Coat liquid provides the following features

- Available in gloss finish
- Offers durability up to two years on uncoated cast, calendared or banner materials
- Environmentally friendly, odour free formulation with low VOC levels
- Compatible with solvent and mild solvent ink technology
- The liquid is touch dry in 30 minutes or less (varies according to material/substrate and environmental conditions) and is cured in 24 hours
- One year shelf life
- Water-based formulation

NOTE: The stand for SEAL Sign Coater is shipped in a separate box

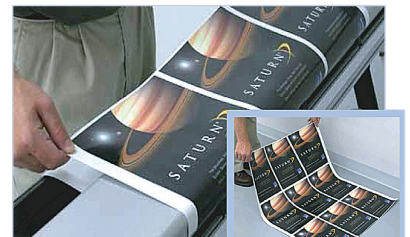

Turn the AquaSEAL Sign Coater on and fill the coating tray with liquid laminate.

Place the image face down, feed through the coater and catch the laminated image as it exits.

Pull the laminated image over the top of the machine and lay on a flat surface to dry.

Turn the drain valve to the open position and recycle the Liquid Laminate back into the original container.
